MASTER YOUR WORLD

Many of us go about life in a kind of daze, being pushed and shoved by the world around us. Going indifferently with the flow and reacting to circumstances because we don't know any other way of being.

There is another way of being...

The answer to reaching our potential is to reinvent who we are in the matter of our life. To develop the capacity to create the future we want.

A relationship with a Genratec™ MasterLiving Coach will be the beginning of an enriching journey to a future that you design and generate.

This professional partnership offers a unique blend of support, wisdom and technology. This path is transformational.

Genratec™ Coaches are people who walk their talk. Their training is as rigorous as the code of conduct to which they must adhere. Every Coach has a Supervisor for their professional development and to maintain their own mastery.

Being ready for a Genratec™ partnership means generating your future and living life at cause. **There is no other opportunity like this – it's personalised to you.**

DIANA PARRY

“My personal development pathway has been an enriching adventure and one in which I’ve created results far beyond my expectations.”

My Genratec™ partnership has given me the confidence and courage to step up and do many things I would once never have believed possible. Asking a man to marry me, following my passion in career choice (and now loving the entrepreneurial challenge of it), beating a life-altering health issue, overcoming a fear of public speaking... My personal development pathway has been an enriching adventure and one in which I’ve created results far beyond my expectations. For example, my ability to positively effect the lives of others as a result of this partnership has been a welcome surprise!

JAY HARRISON

Through a partnership with my own Genratec™ coach I was able to identify things that created resistance for me. This work gave me freedom to move on and become more powerful, personally and professionally. I learned how to participate in my relationships fully and authentically and now have a wonderful partner who matches my core values and future aspirations. Genratec™ has also given me the tools to be more powerful and clear in my business life, assisting me in creating my personal vision and platform for growth. I enthusiastically recommend Genratec™ to anyone who wants more in their lives!

“This work gave me freedom to move on and become more powerful, personally and professionally.”

Theodore Roethke

The Genratec™ MasterLiving Programme is the foundation to provide the structure, technology and means to increasing the capacity of achieving a designed future.

In enrolling in the MasterLiving Programme you will learn to master your own world. You will develop the skills to Clear the way for a future you design then Generate it, Master it and Live it.

CLEAR IT

Create space for new possibilities

GENERATE IT

Reinvent yourself and design your future

MASTER IT

Build the foundations for accomplishment

LIVE IT

Experience being on purpose

1. CLEAR IT

When it comes to living the life we want to, we can often get in our own way. We can inadvertently create obstacles in our path or engage in ways that curtail our progress. The answer to reaching our potential is to reinvent who we are. To clear the obstacles and increase our capacity for accomplishment. When we focus on building our capacity, results are a natural outcome.

UNIQUE CLEARING TECHNOLOGIES

The quality of your life is determined by your choices. If your choices are a consequence of your history and current knowledge, you are likely to make decisions that will keep you locked into the same boring, repetitive patterns. As a result, the same ‘stuff’ will keep turning up.

To clear the way is to expand beyond the limitations of your history.

Easier said than done; however, the unique clearing technologies of Genratec™ programmes give a solid structure to what has traditionally been intangible. Core clearing technologies have been developed and proven over a course of 20 years. These are professionally recognised tools to deal with (and clear) real and sometimes hard-to-handle issues.

WHAT TO EXPECT

During the first phase of development, with the help of your Genratec™ Coach, you will generate your own capacity to clear obstacles with power and ease. Like the necessary process of preparing soil before planting a new crop – clearing creates the healthy ground in which to grow the new things you want.

→ GARTH HILL

“I recognise my unhelpful reactions and now I clear the path to my goals right away, allowing me to continue forward”

GENERATE IT 2.

When you begin to generate the context for your life, you have the opportunity to be masterful in your world. The first step is to design a context for the way you want your world to work. You can then invent your future and create a platform to powerfully realise it. What is it that you want to invent?

UNIQUE GENERATIVE TECHNOLOGIES

The programmes and services delivered by Genratec™ have been distilled from a unique combination of principles established through the millennia. By combining the wisdom of the great masters with the latest insights from science (in areas such as human development, neurophysiology and quantum physics) the results are a number of proprietary technologies. These tools have been created to assist in the mastery process.

Genratec™ has brought the insights of great people into our everyday world, and developed and extended them through research and practice with a single-minded focus – to expand the capacity to deliver extraordinary results for our clients and their projects.

WHAT TO EXPECT

In the process of producing a designed future, you will create a blueprint for the way you want to be and what you want to have in your world.

You will focus on an area of your world that is most relevant to you. Projects can be as diverse as embarking on a new career path or business, spending time with your family, buying a house, or self-development – whatever is of key importance.

During this time you will be coached to stay in alignment with your vision, mission, purpose and core values (all of which you will define in this phase of development work).

3. MASTER IT

Participation with Genratec™ tools and technologies, over time, builds capacity. When it comes to mastery – knowledge and practice pave the way for accomplishment. To reach the heights of your potential requires integrating new possibilities into everyday life. Living life on purpose is an ongoing process of distinguishing and mastering new opportunities.
